SPrice mobile app

Introduction

What is the SPrice mobile app?

SPrice is a mobile application that allows you to find the best grocery product offers sold by major supermarket chains and regional suppliers. Use your mobile phone or tablet to make your stocking up processes easier and get notified on relevant product offers.

Which devices does the mobile app support?

You can install SPrice on any mobile devices running iOS(iPhone, iPad, iPod) and Android(smartphones and tablets) operating systems.

How it works

The SPrice mobile app connects to the SPrice server via the Internet and gets all the relevant data. Note that SPrice mobile app is useless without an internet connection and valid login credentials.

How to install SPrice?

Depending on your mobile device, go either to AppStore or GooglePlay and search for the SPrice app. Then follow the standard installation procedure.

Program workspace

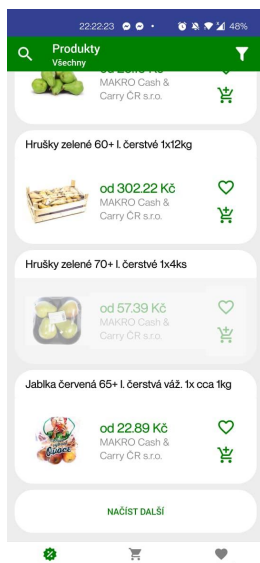

Sign in and Registration

To use the app, you need to sign in using the email address and password of your SPrice account.

If you do not have an account yet, click on the Register button and fill in necessary information.

Product browsing and filtering, and offer selection

After a successful login (or registration) you're welcomed to the **product list view**.

There you can scroll through the list of in-action products.

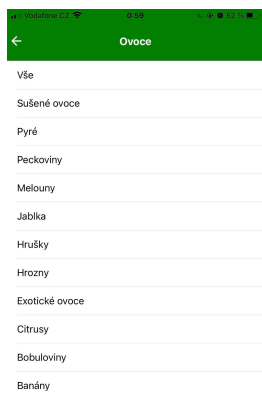

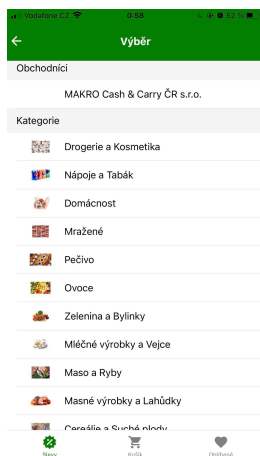

These product cards contain buttons to:

1. add them to the **Favourite list** which fills up the heart icon.
2. summon an **Add-to-shopping-list overlay**.

Tapping on a product (picture or whole card) moves you to the **detailed product view**.

This view can also be reached by tapping on the left main button (in-action).

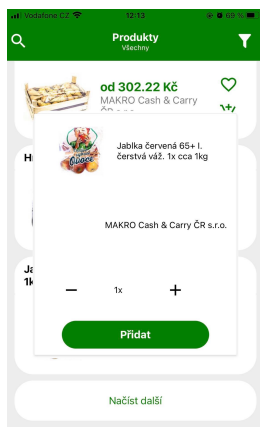

Using the funnel button in the upper right corner enables you to filter the shown products...

...either by vendors or categories and their subcategories, including filtering by *All*, which essentially translates to filtering by the whole category.

You can use backwards arrows in the upper left corner to navigate back to the original view.

Add-to-shopping-list overlay

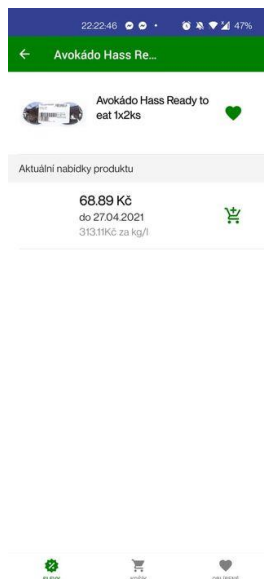

The summoned overlay lets you specify an offer and add it to the **Shopping list**.

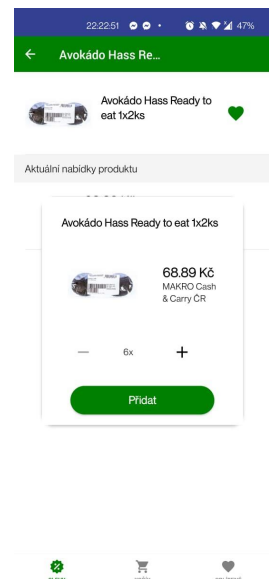

Tapping on the store field to bring up a drop-down menu allows you to select the desired store...

...and you can specify quantity using the plus and minus buttons.

Detailed Product View

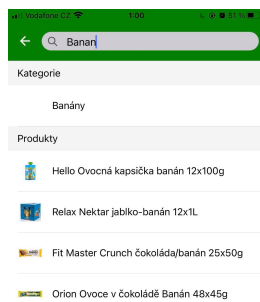

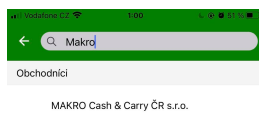

Besides inspecting detailed information about the product, this view allows you to select a particular related offer from the scrollable list of offer cards and add it to the **Shopping list**.

Search

Tapping on the looking glass button in the upper left corner in the product list view brings up the search function. This allows you to search for relevant products, categories or vendors.

The app starts searching upon entering at least 4 letters.

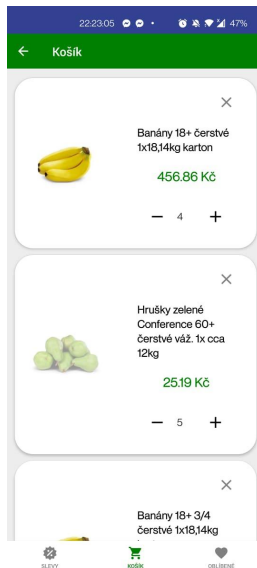

Tapping on a category or vendor applies the respective filter and returns you to the **product list view**.

Tapping on a product navigates you to the **detailed product view**.

Shopping list

The middle main button displays the **Shopping list**. This list contains offers you intend to buy.

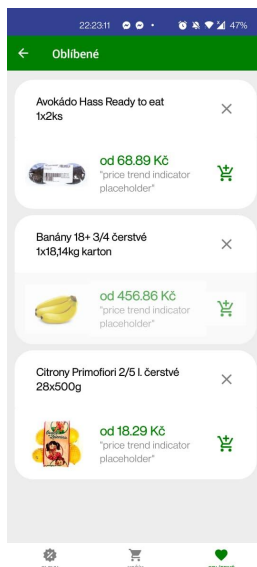

Use these offer cards to adjust quantity or remove the offer from the shopping list.

Tapping on the card navigates you to the **detailed product view**.

Favourite list

Tapping on the filled-up heart main button takes you to the **Favourite list**, which contains your favorite products.

These product cards have the same functionality as those in **product list view**.
